PRODUCT UPDATE

LABFAST MVB FAST
OVERVIEW OF CHANGES

We are excited to announce important updates to the LABPOX MVB FAST product.
The improved version delivers enhanced performance while maintaining the key features you rely on.

KEY NOTES:

+ **Part A and Part B of the improved product are not compatible with those of the previous version due to viscosity differences.**
+ When used together (improved Part A + Part B), the product's viscosity remains comparable to the original (900 cps vs. 1000 cps).

Despite these formulation changes, the main functionalities of the product are fully preserved:

+ **Excellent adhesion to concrete with up to 100% Relative Humidity.**
+ **Exceptional vapor barrier performance with permeability of less than 0.1 perms.**

Additionally, the improved LABPOX MVB FAST now includes the New Pinhole Mitigation Technology that is already featured in Labsurface epoxy products.

PACKAGING NOTE

The improved LABPOX MVB FAST **will be identified with a yellow dot on the box** during the product transition period. This marking will help clearly differentiate the improved version from the previous version until the transition is fully completed.

KEY IMPROVEMENTS IN THE LABPOX MVB FAST

+ Faster tack-free time: 3 hours versus 4 hours.
+ Slightly lower viscosity for easier application and handling.
+ Better resistance to blushing.
+ Enhanced oil resistance for pre-tinted products.

FEATURE	PREVIOUS VERSION	IMPROVED VERSION
Tack-Free Time	4 hours	3 hours
Viscosity	900 cps	1000 cps
Blushing Resistance	Standard	Improved
Oil Resistance (Pre-Tinted)	Standard	Enhanced
Pinhole Mitigation Technology	No	Yes
